

# ***Tasin Academy***

**Opposite to Alekanda Govt College, Barishal**

**Phone: 01722335722**

---

**Artificial intelligence** has the potential to revolutionise the way we learn and teach. As a tool in the classroom, AI can provide students with personalised learning experiences, automate repetitive tasks, and provide instant feedback. However, it also has its limitations. Let us explore the pros and cons of AI as a tool in the classroom, address the concern that AI could be a threat to teachers' and instructors' jobs and discuss the role of edtech companies in advancing this AI use case.

## **Advantages of AI in the Classroom**

One of the main advantages I see of AI in the classroom is personalised learning. AI-powered educational tools can analyse data on student performance and provide tailored support to improve their grades.

AI can also provide instant feedback. For example, AI-powered educational tools can provide students with immediate feedback on their work, allowing them to identify and correct mistakes quickly.

Another advantage of AI is its ability to automate repetitive tasks. It can grade assignments and quizzes, which can free up teachers' time for other tasks, such as lesson planning and providing more one-on-one attention to students.

There are already a few AI tools that support learning in classroom or workplace contexts. For example, Ahura is an AI-powered learning assistant that tracks learning habits by observing attention and engagement. Knewton offers an adaptive learning platform that provides personalised learning experiences for students. Querium is an AI-powered tutor that provides tutoring on math problems and builds personalised lesson plans. ALEKS is an AI-powered learning platform that provides individualised learning paths based on students' strengths and weaknesses. Carnegie Learning offers an AI-powered tutor that helps students improve their math skills by providing personalised learning based on their performance. There's also Smart Sparrow, which allows users to provide more individualised attention to students.

These are just a few examples of AI tools with applications in the classroom. It is important to note that these tools should not replace teachers but rather assist them in their work.

**1.A. Choose the correct answer from the alternatives: (1x5=5)**

**(a) What does the word 'revolutionize' mean in the context of the passage?**

- (i) to make something worse                      (ii) to change something completely
- (iii) to ignore something                      (iv) to simplify something

**(b) What does the word 'automate' mean in "automate repetitive tasks"?**

- (i) to perform tasks manually                      (ii) to ignore tasks
- (iii) to complete tasks without human effort                      (iv) to make tasks harder

**(c) What is the role of AI-powered educational tools in learning?**

- (i) They provide standardized learning experiences.
- (ii) They analyze data for personalized support.
- (iii) They automate lesson planning.
- (iv) They focus on group learning.

**(d) What do the authors suggest about the relationship between AI and teachers?**

- (i) AI should completely replace teachers.                      (ii) AI can support teachers' efforts.
- (iii) Teachers are unnecessary with AI.                      (iv) AI makes teaching easier for everyone.

**(e) Which of the following is a concern about AI in education?**

- (i) AI being too expensive (ii) AI promoting student collaboration  
(iii) AI could threaten teachers' jobs (iv) AI reducing study time

**(f) What is one of the main advantages of AI in the classroom?**

- (i) standardized testing (ii) personalized learning  
(iii) increased workload for teachers (iv) reduced student engagement

**(g) How can AI provide immediate support to students?**

- (i) by providing standard feedback (ii) by offering instant feedback  
(iii) by eliminating homework (iv) by increasing class sizes

**(h) What tasks can AI automate to help teachers?**

- (i) grading assignments (ii) conducting parent-teacher meetings  
(iii) creating lesson plans (iv) supervising classrooms

**(i) What is Ahura designed to do?**

- (i) provide grading services (ii) track learning habits  
(iii) develop curriculum (iv) teach students directly

**(j) Which platform offers adaptive learning experiences?**

- (i) Gradescope (ii) Knewton (iii) Smart Sparrow (iii) Carnegie Learning

**1.B. Answer the following questions:**

**(5x2=10)**

**(a)** What is the potential of AI in revolutionizing the way we learn and teach?

**(b)** How can AI provide personalized learning experiences for students?

**(c)** What are some repetitive tasks that AI can automate in the classroom?

**(d)** Why is it important for AI to provide instant feedback to students?

**(e)** When can AI tools be used effectively in the classroom?

**2. Read the passage and complete the table below with the given information. 1x10=10**

| What/Who                     | Events/Activity                                     | Where/Place      | When/How   |
|------------------------------|-----------------------------------------------------|------------------|------------|
| AI                           | (i).....                                            | in the classroom | (ii).....  |
| (iii).....                   | has limitations                                     |                  | (iii)..... |
| We                           | (iv).....                                           |                  |            |
| (v).....                     | is one of the main advantages                       | (vi).....        |            |
| (vii).....                   | can give students immediate feedback                | (viii).....      |            |
| AI-powered educational tools | can allow students to identify and correct mistakes |                  | (ix).....  |
| (x).....                     | can free up teachers' time for other tasks          |                  |            |

Or,

**Read the above passage and make a flowchart showing the facilities & limitations of AI as a tool in the classroom. (One is done for you.)**

**2x5=10**

|                                                             |   |   |   |   |   |   |   |   |   |   |
|-------------------------------------------------------------|---|---|---|---|---|---|---|---|---|---|
| 1. Provides students with personalized learning experiences | → | 2 | → | 3 | → | 4 | → | 5 | → | 6 |
|-------------------------------------------------------------|---|---|---|---|---|---|---|---|---|---|

**3. Summary Writing**

**10**

Write a summary of the passage in your own words.
